ADJUSTING THE INJECTION RATE (with pressure off)

IMPORTANT ! Use no tools

Ajustment must be made when there is no pressure in the DOSATRON.

- Turn off the water supply and allow the pressure to drop to zero.
- Unscrew the blocking ring (Fig. 13)
- Screw or inscrew the adjusting nut in order to line up the 2 peaks of the eyelet with the desired ratio on the scale (Fig. 14).
- Tighten the blocking ring (Fig. 15).
